

Home Health

How to get started.

You or your loved one simply request a physician's referral for home health care. You can discuss Community Home Health as an option with the doctor.

Managing the costs.

We accept Medicare and we also bill private insurance directly.

Call us for more information.

Community Home Health is a service of Community Home Health & Hospice serving Washington and Oregon families since 1977.

The path to healing begins at home.

www.chhh.org

Everyone feels better at home.

It's proven that most patients do better when they get care at home. Home health care benefits include:

- **Avoiding emergency room visits and hospitalizations**
- **Staying out of nursing homes and other facilities**
- **Faster recovery**
- **Improved quality of life**
- **Reassurance and comfort of familiar surroundings**
- **Having family and friends close by**

Home health services.

Our professional caregivers make recovery at home a worry-free experience. Depending on your loved one's needs, they will receive:

- **Skilled nursing**
- **Wound care**
- **Therapy**
(physical, speech and occupational)
- **Evaluation for needed medical equipment**
- **Telemonitoring**
- **Medical social workers**
- **Home health aides**

Naturally, your loved one's doctor will be included as an important member of the Community Home Health team, which includes nurses, therapists, medical social workers, and home health aides.

It takes a Community to heal.

Since 1977, we have supported the health and independent living goals of individuals at home.

As a local nonprofit healthcare agency, we make it our mission to bring peace of mind to you and your loved ones in times of need.

Based on our long history of skilled, compassionate care, you can rely on us to help your loved one return to health as soon as possible.

Care without leaving home.

If your loved one is homebound due to surgery, illness, or an accident, home health care can help them heal at home, surrounded by family and friends.

With Community Home Health, your loved one will receive skilled nursing care and therapy where they live—in their house, assisted living facility, or adult foster home.
